**Detailed Action**

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 06/17/04 has been entered.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 60, 62, 65, 66, 72, 73, 74, 76, 77 and 78 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Jones et al.

Regarding claim 62, the outer surface of 47 adjacent the finger is synonymous with the claimed platform.

Regarding claim 66, the surface of 47 has a texture.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 60, 65, 70, 71, 73, 74, 77 and 78 are rejected under 35 U.S.C. 103(a) as being unpatentable over Harvill in view of Jones et al.

Art Unit: 3652

It would have been obvious to provide feedback as claimed to the device in Harvill in view of the teaching in Jones.

Regarding claim 70, note cables 62 in Harvill. It is inherent that these cables are guided.

6. Claims 61, 63, 64, 67, 68, 69, 75 and 76 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. Applicant's arguments regarding the force pickoff 30 in Jones have been carefully considered but are not deemed persuasive since each position of 30 represents a different force and thus each position is a measure of a force.

8. Applicant's arguments regarding Harvill have been carefully considered but are not deemed persuasive since Jones teaches force feedback.

9. Since the above rejections and the claims they reject are identical to the rejections and claims rejected in the previous rejection the following action is deemed appropriate.

10. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 3652

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
